Experience

De Lazy Lizard | Host/Server | Ocean City, USA | June 2019 – September 2019

- Participated in a Work & Travel program for Students where I worked as a Server at a restaurant.
- Managed cash and credit card transactions, as well as delivering excellent customer service.

METRO D.O.O. | Commissioner | Munich, Germany | June 2021 - September 2021

- Managed day-to-day warehouse operations, overseeing order fulfillment, inventory, and safety protocols.
- Conducted product tracking using specialized equipment and transmitted data to the office computer.
- Created daily reports for the management department, by importing data into Microsoft Excel each workday.

Bridgetown Solutions D.O.O. | Sales Agent | Belgrade, Serbia | May 2022 – March 2023

- Promoted to Senior Sales Agent within 3 months due to achieving exceptional results.
- Managed meeting schedules using Google Calendars to ensure client satisfaction and timely follow-up.
- Utilized CRM system to input and analyze data, providing valuable feedback to the marketing team.

Native Camp | English Teacher | Remote | April 2023 - present

- Providing feedback on reading, writing, comprehension, and pronunciation, helping them learn English.

Education

High School of Economics (2013 – 2017)

Economics technician

University of Kragujevac (2017-2022)

Bachelor's degree at the Faculty of Technical Sciences, Information Technologies

The Silesian University of Technology (February 2021. – June 2021.)

Erasmus Program Semester at the University of Automation, Engineering, and Computer Science

ZTM Academy (April 2023. -June 2023.)

Python Zero To Mastery Course oriented on Testing, Web Development, and Data Sciences

Projects

Password Checker Web Application | Python, Flask, Hashing (June 2023)

Developed a Web Application with Python on Flask server that integrates with a secure API, whether a user password has been compromised in the previous breaches while implementing hashing for privacy protection.

Hacker News Scraper | Python, Web Scraping, Pandas May 2023

Utilized libraries such as requests and BeautifulSoup to make an application for web scraping, extracting relevant information like article titles, links, and vote counts from the News Website.

The Fruit Guesser | Java, Swing GUI – February 2023

Developed a Java-based Fruit Guessing Game application with a Swing GUI, enabling users to guess randomly generated fruits and track their score while utilizing OOP principles to ensure modularity and reusability.
